

Eskair Products
2021 Catalogue

Eskair designs, manufactures and installs outdoor recreational equipment made from cedar. We offer a wide range of playground modules and accessories, original street furniture, as well as adult fitness equipment, all adapted to the natural environment to create a striking effect! Eskair also provides a turnkey planning, development and integration service, a support service and an engineering and architecture department in order to carry out your most ambitious projects.

Founded in 2014 by Éric Bourgault, a recreologist by training and construction contractor, the Drummondville company distributes its products throughout Quebec, Canada and the United States. Eskair's focus is on the needs of creative and psychomotor development in childhood, as well as to promote healthy lifestyles. We are committed to creating meaningful playgrounds, as well as exercise, teaching and socializing areas suitable for the local environment, which are well designed and inspired by nature.

SIGNATURE ESKAIR SOLUTIONS

With its expertise in designing smart and forward-thinking spaces, Eskair has developed an approach to support and collaborate with its customers. We also specialize in schoolyard revitalization and have the ability to create custom equipment to meet your needs. Our recognized expertise greatly simplifies your project and guarantees that it will be appreciated by your customers.

Our range of products and services

- ✓ Preschool and school playgrounds (18 months to 12 years)
- ✓ Urban, parks and public spaces furniture
- ✓ Fitness courses
- ✓ Project design integrated into your landscape and environment
- ✓ Custom or themed playground design
- ✓ 2D and 3D project implementation plan
- ✓ Consultation and project concept design

Eskair, oversized, playful and creative modules

Overview

- ✓ All of our equipment meets the Canadian CAN/CSA Z614-20 playground standard.
- ✓ Our playgrounds are equipped with CSA-certified cedar fibre for play areas.
- ✓ All of our play modules are constructed from eastern white cedar or western red cedar, species known for their resistance to rot. Our equipment is therefore delivered without chemical treatment. Cedar is also known to pose little risk of splinters, has good structural uniformity and very high resistance to insects in its natural state.
- ✓ We use cedar logs 4 to 12 inches in diameter that give our equipment a remarkable appearance and strength, far exceeding the structural integrity requirements of the equipment.
- ✓ Our 100% natural and untreated wood enables us to offer you a warranty for up to 12 years and requires little maintenance. Ask for a list of our warranties for more details!
- ✓ We use quality hardware that doesn't rust and is anti-theft. Our cables are made of steel covered with industrial-grade braided polyester.

- ✓ Check out more information and more photos and videos on the web:
www.eskairamenagement.com
www.facebook.com/eskairamenagement
- ✓ RBQ license #5766-8014-01
- ✓ Quebec business number (NEQ) #1173370348

Our sales team is waiting for your call to help you create your new recreational design!

ventes@eskairamenagement.com

"As a schoolyard project manager, Eric has helped us greatly in all stages, including support, estimates and installation. His knowledge saved us time and money. I enjoyed working with Eric, his approach is friendly and he always has a solution to offer us."

Luc Michaud, Dir. École Jardins des lacs, St-Denis-de-Brompton

"Thank you Eric, to you and your team, for the construction of two parks within our municipality. There were many comments from citizens over the summer to express their satisfaction with the final result.

Through our more limited resources, your support in the parks' design enabled you to draw on your expertise and develop several innovative and practical ideas, ideas that we had not thought of prior and yet made all the difference for our residents. [...]

The work for the layout and installation of the various modules was done with high quality, on time and at a lower cost. It was truly a more than profitable partnership!"

Matthieu Levasseur, Dir. General, Ste-Clotilde-de-Horton

Description

The talk tube is a popular accessory for children because it allows for imaginary play. 2 speaking boxes are connected by a sound-conducting tube buried underground. Children can have conversations with each other by being at opposite end of the tube. The system can be installed everywhere in your park, for example between two small cabins or under a slide. Our assembly hides the hardware inside the pole, so it is impossible to insert objects into the tube that could clog it.

Description

Tractor tires are a very popular piece of equipment. Children can climb, crawl and jump from one tire to another. It's an inexpensive piece of equipment that brings a lot of playful value to your playground. The recycled tires we use come from partner companies that select tires that can be reconditioned. They are then cleaned before being installed.
